

# Joe Loach (he/him)

A motivated Software Developer with a strong foundation in SoC design, AI, and GPU programming.  
Proven experience in building hardware and software solutions through University projects and freelance work.  
Seeking a developer role to apply and expand technical skills in a professional setting.

## Education

<b>The University of Manchester</b>   High 2:1	Sep. 2021 - Jun. 2024
<i>Bachelor of Computer Science</i>	
<ul style="list-style-type: none"><li>• Awarded top 5%, First class grade for Third Year Dissertation, Project and Screencast.</li><li>• Received distinctions for innovative and creative approaches for AI model implementation.</li></ul>	
<b>Ecclesbourne School</b>   A Levels	Sep. 2019 - Jun. 2021
A* Computer Science, A* Mathematics, A Physics	

## Experience

<b>SmartUI</b>   C#, Unity, Adobe Photoshop, Github, Teams	Jun. 2023 - Sep. 2023
<i>Freelance for Digital Spirit Ltd</i>	
<ul style="list-style-type: none"><li>• Created complex mesh effects for non-destructive edits to 2D Components for UI.</li><li>• Designed custom Unity editor UIs with Multi-object and Undo support for seamless integration.</li><li>• Tightly coupled communication with client over GitHub issues and Teams to deliver maximal UX.</li></ul>	

## Coursework

<b>Implementing System-on-Chip Designs</b>   High 1st	Jan. 2024 - May. 2024
<ul style="list-style-type: none"><li>• Developed, debugged, and verified a CPUs FSM module using Verliog in Cadence.</li><li>• Implemented an ASIC Mandelbrot hardware accelerator integrated with a VGA controller.</li></ul>	
<b>Natural Language Understanding</b>   High 1st	Jan. 2024 - May. 2024
<ul style="list-style-type: none"><li>• Leveraged Keras and Python to create AI deep learning models for textual evidence detection.</li><li>• Adapted ideas from current state-of-the-art models to create a novel DNN architecture.</li><li>• Lead a small group to deliver two exceedingly creative and accurate models.</li></ul>	

## Projects

<b>ARM Assembler</b>   Rust, Javascript, Markdown, mdbook	Aug. 2024 - Present
<i>ARM subset (HAND) compiler and interactive learning handbook.</i>	
<ul style="list-style-type: none"><li>• Hand-written lexer, parser and grammars for recoverable syntax trees and deeply informative errors.</li><li>• Parses UAL to define a customisable instruction set.</li><li>• Generates JS and Markdown to create an interactive booklet with runnable code.</li></ul>	
<b>Third Year Project &amp; Dissertation</b>   Rust, WGSL, Vulkan, WebGPU	Sep. 2023 - Apr. 2024
<i>Real-time physically accurate black hole renderer.</i>	
<ul style="list-style-type: none"><li>• Developed GPU kernels to accelerate the path tracing algorithm.</li><li>• Custom hardware agnostic renderer, multithreading on the CPU with SIMD.</li></ul>	

## Teaching

<b>Tutoring</b>   GCSE Maths and Physics	Jun. 2021 - Sep. 2021
<ul style="list-style-type: none"><li>• Effectively explained and communicated ideas to others in an structured environment.</li><li>• Adapted to students gaps in knowledge and proactively applied creative solutions to fill them.</li></ul>	

## Technical Skills

### Programming Languages

Rust, Verilog, C#, C++, C, Python, JavaScript, TypeScript, Lua, Haskell, Java, HTML, CSS

### Technologies

git, cargo, VSCode, Visual Studio, Cadence, Eclipse, Adobe Photoshop

## Interests

- **Squash:** I am a keen squash player of 10 years, cultivating my competitive nature and teamwork skills through the university society.
- **Music:** I've been a member of various choirs and within the last year taught myself how to play the electric and acoustic guitar, recently experimenting with creating and recording my own music using Reaper.
